For example, your organisation's foyer probably won't need security controls. If for some reason you do keep sensitive information there, it would be worth relocating it to put the foyer out of scope. A well-defined scope ensures that every area of your organisation receives adequate attention when it comes to implementing security controls.

If, for example, the security of services or systems in a particular department are beyond the control or authority of the owners of the ISMS, they should not be included in the scope. In the context of an audit, agreeing which systems are in scope may be particularly important so as to ensure that it is clear which systems the auditor is authorised to access and under what circumstances.
