Featuring more than 1,000 questions, video vignettes, and an online timed assessment, Psychiatry Test Preparation and Review Manual, 4th Edition, remains your #1 choice to prepare for successful exam results in both psychiatry and neurology. This trusted review covers every area of the ABPN board exam, and is also an excellent resource for MOC and PRITE study. Updated content includes questions regarding epidemiology, sexuality and gender, and substance addiction, as well as revisions to match DSM-5 criteria. Features six tests of 150 multiple-choice questions each, as well as 160 multiple-choice questions related to 25 case vignette videos. Allows you to see results broken down by topic online, so you can target areas needing further study. Bookmarking and score archiving are also available online. Permits you to exclude topics which are not included on the MOC, such as neuroscience and neurology, so you can more narrowly focus your study. Brings you up to date with new information in epidemiology, LGBT sexuality and gender, and substance addiction, as well as the most current DSM-5 criteria. New case vignette videos also reflect these additional key areas. Gives clear explanations for both insufficient/incorrect and correct answers, and provides recommended readings from key textbooks.

The first comprehensive psychiatry review textbook, designed expressly for the Canadian market, *Psychiatry Review and Canadian Certification Exam Preparation Guide* is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign-trained psychiatrists seeking to practice in Canada. This new volume, based on *The American Psychiatric Publishing Board Review Guide for Psychiatry*, has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature, and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The volume takes the reader from the basic sciences comprising the foundation of psychiatry, through the psychiatric interview and

other diagnostic topics, to syndrome-specific chapters paralleling DSM-IV-TR, and finally to current treatment options. Rounding out the review is a 200-question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, Psychiatry Review and Canadian Certification Exam Preparation Guide will help the prospective exam-taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

From Massachusetts General Hospital - ranked #1 Department of Psychiatry, for 16 consecutive years, and one of the world's leading centers for psychiatry education, research, and treatment - comes this unrivaled, complete overview of the field of psychiatry. This remarkable text is designed as a study aid for excelling on shelf exams, board certification and re-certification exams. The Massachusetts General Hospital Psychiatry Update & Board, 3rd edition can be used for CME credits, or as a clinical refresher; it combines review material with a Q&A format (geared to each chapter) - and gives you the latest information in the field, using the most recent DSM-IV terminology. 250 board-style questions with annotated answers. With in-depth coverage that ranges from neuroanatomy and psychopathology to therapeutics, to group therapy and imaging, the book is designed to meet the curriculum requirements of the National Board of Medical Examiners and the American Board of Psychiatry & Neurology. It considers the full spectrum of both psychiatric and neurological disorders including: - Neuromuscular disease - Seizures - Stroke and TIA - Dementia - Sleep Disorders - Mental Retardation - Eating Disorders - Disturbances of Mood and Anxiety - Behavioral Disturbances - Neuropsychiatric Disturbances - And many others This unique skill-and-knowledge-building tool gives you a thorough look at topics of special interest, such as medico-legal issues in medical practice, the violent patient, HIV disease, psychosexual disorders, suicide, substance use and abuse, mood/mental disorders and the

reproductive cycle, child and geriatric psychiatry, and end-of-life care. What's more, it also provides step-by-step guidelines for the administration of psychopharmacologic drugs and the management of their reactions.

Psychiatrists and residents are faced with the important -- but what may feel overwhelming -- task of refreshing their knowledge of the whole of psychiatric practice, typically while remaining engaged in full-time clinical activity. Psychiatrists will find the logical structure, substantive questions, and thorough explanations provided by the Study Guide for the Psychiatry Board Examination to be as reassuring as they are educational. Although readers are advised to consult a range of resources in preparation for the examination, this guide is indispensable. It is the first and only guide to reflect the revisions contained in DSM-5®, and it will ably assume a primary role in the study and review process. The guide is designed for maximum usefulness, with specific features and attributes to support knowledge recall and successful examination performance. \* The authors are from a cross-section of accomplished students, fellows, and junior and senior faculty, all of whom have faced or will face the board examination and who understand its importance to the profession.\* Topics were determined by the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint.\* The approximately 400 questions were formulated from information extracted from widely available American Psychiatric Publishing textbooks and accurately reflect the accepted psychiatric knowledge base.\* Each multiple choice question is followed by an explanation of why the correct answer is correct and the others are incorrect, and every question and explanation is referenced, directing the reader to the primary material for more in-depth learning and study.\* The volume was designed as a study guide for both the initial psychiatry board examination and the recertification examination. The process of

working through the study guide will allow the reader to identify areas of strength and weakness, initiate further study, and test and retest knowledge, ultimately preparing for the examination's rigors. Only the Study Guide for the Psychiatry Board Examination offers support for the new, DSM-5® -- compatible examination, and that alone renders it essential.

Kaplan & Sadock's Study Guide and Self-Examination Review in Psychiatry is a comprehensive review of the specialty and perfect for stand-alone review or as preparation for the PRITE in-service, ABPN Part I, and recertification examinations. The book contains more than 1,600 multiple-choice questions and answers, with explanatory discussions of correct and incorrect responses. Chapters parallel the essential corresponding chapters in Kaplan & Sadock's Synopsis of Psychiatry, a staple of psychiatry education around the globe. Terms and definitions are consistent with DSM-IV-TR and ICD-10.

The field of psychiatry is evolving rapidly specifically in the areas of classification of many psychiatric disorders, psychopharmacology and psychotherapeutics. The new Diagnostic and Statistical Manual of Mental Disorders: DSM-5 which was introduced in 2013 forms the basis of the new classification system in psychiatry. The American Board of Psychiatry and Neurology is also in the process of phasing in DSM-5 criteria to the board examination, such that by 2017 the examination material will exclusively reflect the new manual. As psychiatric trainees and psychiatrists prepare for their certification and recertification examinations using the new classification system, a new board review textbook is imperative to address these changes in order to prepare them for the certification examinations as well as for their clinical practice. To help with this process we have compiled a list of 1000 questions and answers in psychiatry and neurology using the most current information available in the field and using

the DSM 5 classification system. This book has been specifically written for the busy professional who does not have the time to access numerous resources necessary to prepare for professional examinations.

It is a daunting task to distill a psychiatrist's education and training into a single, comprehensive resource, but that is precisely what this review guide does to thoroughly prepare candidates taking the American Board of Psychiatry and Neurology Examination in Psychiatry.
