NEW contributors – leading experts in the field – update the book's content.

Health care is a team effort, so why keep training for solo sprints? Introducing Foundations of Interprofessional Collaborative Practice in Health Care - a unique new textbook that will equip you to become an effective member of interprofessional healthcare teams. This completely new textbook is the first on the market to introduce the Interprofessional Education Collaborative (IPEC, 2011, 2016) Core Competencies for Interprofessional Collaborative Practice and to provide practice in applying these competencies to everyday practice. Expertly written by an interprofessional team for a wide variety of health professions students, this textbook provides a solid foundation in the four Core Competencies: Values and Ethics for Interprofessional Practice, Roles and Responsibilities, Interprofessional Communication, and Teams and Teamwork. It then elaborates each Core Competency by defining and describing each Sub-Competency. With a variety of interactive Case Studies, Caselets, and Exemplar Case Studies, it then illustrates the contributions and interconnectedness of each provider's role to demonstrate how Core Competencies would be applied and put into action for improved patient outcomes. UNIQUE! Three-part units each addressing one of the four IPEC Core Competencies to help you to understand the core competencies and learn how to apply them in your own profession. UNIQUE! Detailed explorations of each Sub-Competency for all four IPEC Core Competencies thoroughly present the essential elements of each Core Competency for deep understanding of how to collaborate with other professions. UNIQUE! Case Studies, "Caselets," and Exemplar Case Studies illustrate each competency and provide opportunities for you to apply your understanding of the material. A variety of Active Learning activities driven by core content are integrated into each chapter. UNIQUE! Global Perspectives boxes and additional international resources highlight the important work being done internationally in interprofessional education and interprofessional collaborative practice. Research Highlights help you to understand the reasoning and knowledge behind the Core Competencies. Learning Outcomes and Key Points outline and review the main takeaways from each chapter.

Easy to read, visually engaging, and updated with the latest practices and considerations in clinical nursing practice, Leddy & Pepper's Professional Nursing, 10th Edition provides a practical overview of the contemporary nursing profession and addresses the philosophical, developmental, sociocultural, environmental, political, health care delivery, and leadership issues essential to career enhancement in clinical practice. This enhanced 10th Edition is accompanied by a robust package of interactive resources that engage today's learners and help you instill the understanding and confidence for clinical nursing success.

Designed to help medical educators implement better assessment methods, tools, and models directly into training programs, Practical Guide to the Evaluation of Clinical Competence, 2nd Edition, by Drs. Eric S. Holmboe, Steven J. Durning, and Richard E. Hawkins, is a hands-on, authoritative guide to outcomes-based assessment in clinical education. National and international experts present an organized, multifaceted approach and a diverse combination of methods to help you perform effective assessments. This thoroughly revised edition is a valuable resource for developing, implementing, and sustaining effective systems for evaluating clinical competence in medical school, residency, and fellowship programs. Each chapter provides practical suggestions and assessment models that can be implemented directly into training programs, tools that can be used to measure clinical performance, overviews of key educational theories, and strengths and weaknesses of every method. Guidelines that apply across the medical education spectrum allow you to implement the book's methods in any educational situation. New chapters on high-quality assessment of clinical reasoning and assessment of procedural competence, as well as a new chapter on practical approaches to feedback. Reorganized for ease of use, with expanded coverage of Milestones/Entrustable Professional Assessments (EPAs), cognitive assessment techniques, work-based procedural assessments, and frameworks. The expert editorial team, renowned leaders in assessment, is joined by global leader in medical education and clinical reasoning, Dr. Steven Durning.
