[While many facets of our lives are rapidly becoming more digital, educational institutions are now faced with the task of finding new and innovative ways to incorporate technology into the classroom. Examining the latest trends in digital tools provides a more effective learning environment for future generations. The Handbook of Research on Digital Content, Mobile Learning, and Technology Integration Models in Teacher Education is a pivotal scholarly reference source that outlines the most efficient ways for educators to employ technology-enhanced lesson plans in their classroom. Featuring pertinent topics that include blended learning environments, student engagement, artificial intelligence, and learner-centered pedagogy, this is an ideal resource for educators, aspiring teachers, and researchers that are interested in discovering recent trends and techniques related to digital learning environments and technology-enhanced classrooms.](#)

[Human language technology is the study of the methods by which computer programs or electronic devices can analyze, produce, modify or respond to human texts and speech. It consists of natural language processing and computational linguistics on the one hand, and speech technology on the other. This book presents the proceedings of the 9th International Conference, Human Language Technologies - The Baltic Perspective \(Baltic HIT 2020\), organised in Kaunas, Lithuania on 22 and 23 September 2020. This biennial conference offers researchers a platform to share knowledge on recent advances in human language processing for the Baltic languages, as well as promoting interdisciplinary and international cooperation in human language-technology research within and beyond the Baltic States. In addition to the traditional topics of natural language processing and language technologies, this year's conference featured a special session on resource and tool development for teaching and learning the less resourced Baltic languages. This year, 42 submissions were received, each of which was evaluated by two reviewers, resulting in a total of 34 papers being accepted for presentation and publication. The book is divided into four sections: speech and text analysis \(9 papers\); machine translation and natural understanding \(6 papers\); tools and resources \(14 papers\); and language learning resources \(5 papers\). Providing a fascinating overview of current research in the field from a primarily Baltic perspective, the book will be of interest to all those whose work involves human language technology.](#)

[4LTR Press solutions give students the option to choose the format that best suits their learning preferences and needs. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.](#)

[An important contribution to the debate on the economic impact of information technology, this volume collects papers presented at the Third International Information Research Conference & addresses a range of inter-related topics--the role of information technology in the international division of labor; ways to measure the economics of information; & changes in the political & legal information context. The distinguished panel of contributors from the U.S., U.K., & France include Michel Menou, international consultant in information management, development & education; Jose-Marie Griffith from the University of Tennessee; & Michael Hill, former Director of British Library-Science Reference Information Service. Invaluable for managers & directors in academic, public & government libraries, CHANGING INFORMATION TECHNOLOGIES will also interest graduate students in the field. \(BRITISH LIBRARY RESEARCH SERIES\)](#)
